

Tailwind CSS

How to Start ?

Step 1)

Open Project Folder with a Code Editor (i.e VS Code)
Run These Command in Terminal -

```
npm init -y
```

```
npm install -D tailwindcss postcss autoprefixer vite
```

```
npx tailwindcss init -p
```

Step 2)

Open tailwind.config.js file and Change
content: [] to content: ["*"]
For Apply TailwindCSS for Whole Web-Page

Open package.json file and Change in Script
"Test" : "Some Text Saying Exits with Code 1"
To
"Start" : "vite"

Step 3)

Make a index.html file
Make a main.css file
Link CSS file to HTML Doc

Add the Tailwind directives to your CSS

```
@tailwind base;  
@tailwind components;  
@tailwind utilities;
```

Thank You.

Step 4)

Run These Command in Terminal for Output

```
npm run start
```

And Boom!! Your Page is Live for Development !!!

How to Deploy Tailwind ?

Open package.json file and add these code in Script Section

```
"build" : "vite build"
```

Save and Run This Command in Terminal

```
npm run build
```

And Taa-daa-h, You Will Get a Folder Where You Get Your Website and Assets Ready to Deploy as Your Wish!!

Thank You.
